Committees at Fresno City College

Introduction

Committees at Fresno City College follow the principles outlined in the Fresno City College Governance Handbook. The purpose of the Fresno City College governance structure is to provide each constituent group the opportunity to participate in the planning process and develop, review, and revise policies and procedures. The recommended governance structure promotes collegiality, facilitates collegial communication, and resolves issues as close to the point of origin as possible.

The degree of constituent involvement shall be directly related to the extent of the impact of the decision.

Participants are responsible and accountable to their constituent groups in communication and execution of role.

Decisions made through the participatory governance process necessitate joint commitment and support for implementation. (FCC College Governance Handbook)

The committee chair is responsible for arranging clerical support for committee business in addition to his or her normal responsibilities as a committee member. Committee chairs are responsible for presenting committee business of college wide importance to the President's Cabinet or the Strategic Planning Council. Committee chairs will provide a progress report to the college president or Strategic Planning Council at the end of each year.

Section 1: College Governance Groups

Constituent groups are responsible to ensure representatives are appointed and participate regularly on college governance councils and committees. Such participation includes attending meetings, committee members reporting back to the constituent group they represent the issues under discussion, and representing the positions of the appointing constituent group in order for these participative processes to assure effective discussion, planning, and implementation. It is the belief of the college community that such participation will encourage individuals and constituent groups to bring forward ideas for institutional improvement and create an environment in which there is greater campus acceptance and support for decisions made in this manner. (FCC College Governance Handbook)
