

Fresno City College Radiologic Technology Program

Mission Statement, Program Goals, and Student Learning Outcomes

Program Mission

It is the mission of the Radiologic Technology Program at Fresno City College to prepare and graduate students with the entry-level skills required for careers in radiography, and to become employable in the community, the state of California, the Nation and the international arena.

Program Goals and Student Learning Outcomes

It is the policy of the Fresno City College Radiologic Technology Program to ensure excellence in education through a means of goals and objectives. Continuous assessment of the Program's mission, goals and objectives has been implemented to enable the Program to attain a high level of student success. Compliance is achieved through a multitude of surveys that cover the degree of satisfaction with all aspects of the Program. Survey feedback is the driving force by which the Program implements positive changes and monitors its success. The goals are as follows:

Goal #1. Students will graduate with a high degree of clinical competency and knowledge.

Student Learning Outcomes: Students will produce diagnostic images.
 Students will apply positioning skills.
