

FIREARMS INSTRUCTOR PRE-EXAMINATION

20 total rounds will be used for the testing. The shooter will shoot from four distances, also referred to as stations.

First station is at the 25 yard line. The shooter will shoot a total 4 rounds, no time limit, from any shooting position they wish.

Second station is at the 15 yard line. The shooter will shoot a total of 6 rounds, controlled pairs. The shooter will repeat the controlled pairs three times, with a time limit of 4 seconds, each controlled pair, at the command of the firearms instructor.

Third station is at the 7 yard line. The shooter will shoot a total of 4 rounds, no time limit, using their support hand only.

Forth and final station is at the 7 yard line. The shooter will shoot a total of 6 rounds. This will be the failure drill, meaning two shots to chest and one shot to the head of the target, with a time limit of 5 seconds. The shooter will repeat this drill twice at the direction of the firearms instructor for the total of 6 rounds. **NOTE: The two rounds of head shots shall be in the target's head area to be counted. If they strike below the head area into the main body of the target, they will not be counted as part of the total shot count.**

The pass score is 80 percent, which is 16 rounds out of 20 placed on the target. If you have further questions, you can telephone the academy at (559) 442-8277 or email, fred.johnson@fresnocitycollege.edu
