

National Science Foundation  
WHERE DISCOVERIES BEGIN

## ***Become a Paid “Water Bear” Scientist***

*“Water Bear” is a nickname for the tardigrade, arguably the toughest animal on the planet. NASA has proven they can survive extreme conditions to include the vacuum of space, absolute zero, intense heat, and various conditions not yet found here on earth.*

### Job Description:

Primary duties are to preserve, digitize, and data base the tardigrade collection of the Bohart Museum, UC Davis here at Fresno City College. You will also have the opportunity to conduct original tardigrade cryptobiosis experiments. Other duties include giving Elroy Robinson Museum of Natural History tours to the public and field study.

- Flexible Hours
- Gain Valuable Experience as an Undergraduate
- Become a Published Scientist
- Be Apart of Cutting Edge Science
- Work in a National Science Foundation Funded Lab
- Federal Work-Study and NSF Funded Positions Available
