## Notes:

1. Psychology is the scientific study of human behavior and mental processes. Psychology emphasizes the use of critical thinking and the scientific method to ask questions, acquire and evaluate information, and solve problems. The field recognizes the complexity of human behavior, and is guided by the idea that a complete understanding of human behaviors, emotions, and thoughts must include an analysis of factors as diverse as biological, interpersonal, and sociocultural influences. Thus, psychology represents a method of inquiry that can be a useful tool for students with a variety of interests and career goals.
2. The *Associate Degree* requires completion of the major (22 units) with a "C" or better grade in each course plus the completion of the General Associate Degree requirements – basic competencies, physical education/Dance, and lifetime physical and mental wellness – and General Education requirements for a total of **60 semester units minimum** with a 2.0 or better GPA.
